DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
 2. Ascertaining the differences between the prior art and the claims at issue.
 3. Resolving the level of ordinary skill in the pertinent art.
 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
2. Claims 1-3,5-17,19-29 and 31-44 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bash et al. (U.S. Patent Number 6,786,056) in view of Spinazzola et al. (U.S. Patent Number 6,412,292) and further in view of Hergatt et al. (U.S. Patent Number 3,777,506).

In regard to claims 1 and 13, Bash et al. disclose a cooling system with evaporators distributed in parallel for future data center involved many small (1,000 to 2,000 sq. ft.) and readily deployable data centers that are akin to portable building or shipping containers (col.2, lines 35-38). The room 10 may comprise more than one room and the cooling system 20 may be configured to cool a plurality rooms. Bash et al. also disclose the cooling of the data center. Spinazzola et al. disclose the cooling air generated from a cooling apparatus into an air passageway formed below a floor and the cooling apparatus located outside the computer room.

Hergatt et al. disclose a separate container for air conditioner supplying cooling air to trailers or mobile homes. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the apparatus of Bash et al. with a passageway of Spinazzola et al. and mobile air conditioner of Hergatt et al. to cool the mobile computing system.

In regard to claims 2,3,5-12,14-17,19-29 and 31-44, official notice is taken these limitations are either obvious or used in the prior art which including Applicant provided prior art.

Conclusion

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
